In Sweden, the longest day of the year is celebrated in June. It is the start of a five-week holiday. Most people go on a trip to the country with their families. Children put flowers in their hair and everyone eats a special cake. In the evening, a family meal is eaten. This usually includes <i>herring</i> : there are a lot of these in the sea around Sweden. After people have eaten, they usually go for a walk. Nobody goes to bed before twelve o'clock on this special day! There is sunshine until very late at night in Sweden at this time. In the north it does not get dark at all! It can be difficult to sleep. To help <a href="them">them</a> , people should find a room that is not very light.

Many famous people were amazing when they were children. Mozart was able to play music when he was three and could write music when he was five. Judit Polgar is a great chess player. She was able to win chess games against some adults when she was twelve years old and she won chess competitions when she was fifteen. Karl Benz went to university to study to be an engineer when he was fifteen and he later invented the car. And the great scientist Marie Curie taught herself to read Russian and French when she was four. She could also help her older brothers and sisters with their maths homework! However, some people who do amazing things when they are children become ordinary adults: not all of them are able to become famous.

Many experts think that people first played rugby in 1823. At this time, students at Rugby School in England were playing football. Then, a boy called William Webb-Ellis took the ball in his hands and ran towards the opponents. This made a new game. To score in rugby, teams have to run with or kick the ball to one end of the field. The ball is oval, like an egg. You have to be fast and strong to be good at playing rugby. Many players, who can weigh about 300 kilograms, are very big! Today, rugby is very popular in many countries. About 100 countries play the sport. However, it is not as popular as football. More than 200 countries play that sport.

There are about 285 million people in the world who are blind or find it difficult to
see. However, not many of these people can read Braille. The problem is that
Braille books are not cheap. The cost of making a Braille book is four or five times
more than any other book. Technology can help blind people. Some of them can
listen to news and information on smart phones. There are also "talking books"
